

**Position Title:** Fisheries Biologist I / II (Habitat Specialist)

**Agency/Location:** Yakama Nation Fisheries Program, Klickitat Field Office, Wahkiacus, WA

**Responsibilities:** Responsibilities: Works in a multidisciplinary environment to develop, implement, and monitor watershed restoration and enhancement projects in the Klickitat River subbasin. Conducts assessment, planning, design and oversight of restoration and enhancement treatments, including those associated with in-channel restoration, forest road treatments, fish passage restoration, revegetation, fence construction, and weed control. Plans, conducts, and supervises field surveys to evaluate project effectiveness including spawning ground surveys, electrofishing, snorkeling, measurement of physical channel and floodplain characteristics, streamflow monitoring, groundwater monitoring, and water quality. Prepares proposals, permit applications, budgets, and reports.

**Minimum Qualifications:** Bachelor of Science degree that included at least 6 semester hours in fishery biology, fisheries habitat, or related courses in the field of fishery biology AND 30 semester hours in the natural sciences in subjects such as zoology, ecology, botany, soil science, geology, hydrology or research in these fields AND at least 24 months (cumulative) of related work experience as a technician or scientist. Biologist II requires two years of related work experience as a Biologist I or equivalent. A Master of Science degree in a related field may substitute for up to one year of experience. Experience working in a multi-disciplinary environment preferred.

**Salary:** hiring range - \$35,841 to \$43,179/yr (D.O.E.)

**Closing Date:** open until filled (first review of applications will occur on 6/4/08)
